**Instructions:** The OAK™ is designed especially for smaller volume users that only have a few samples per year. The testing selected is perfect for automobile engines and transmissions. Of course, the kit allows for sampling of diesel trucks, motor homes, tractors and/or boats and the same testing applies. If taking oil samples at scheduled oil change intervals, all you need is the basic OAK™. Sampling pumps to draw samples from the dipstick are not required. If taking the sample through the dipstick, a sample pump and tubing should be ordered. For How to Sample Instructions go to <http://www.herguth.com/sampling.htm>
